## 1 Introduction

This Integrated Billing (IB) patch introduces substantial changes to VistA's electronic Insurance Verification (eIV) Eligibility Inquiry and Response Processing in order to meet the Committee on Operating Rules for Information Exchange (CORE) Operating Rules.

APPLICATION/VERSION	1			PATCH
INTEGRATED BILLING	(IB)	V.	2.0	IB*2*497

This patch (IB\*2\*497) is being released in the Kernel Installation and Distribution System(KIDS) distribution.

#### 1.1 Documentation Distribution

Updated documentation describing the new and modified functionality introduced by this patch is available.

The preferred method is to FTP the files from REDACTED This transmits the files from the first available FTP server. Sites may also elect to retrieve software directly from a specific server as follows:

Albany	REDACTED	REDACTED							
Hines	REDACTED	REDACTED							
Salt Lake City	REDACTED	REDACTED							

Documentation can also be found on the VA Software Documentation Library at:http://WWW.va.gov/vdl/

# 2 Patch Description and Installation Instructions

#### 2.1 Patch Description

Subject: E-IV PROVIDER OPERATING RULES

Category: DATA DICTIONARY

ROUTINE ENHANCEMENT

OTHER

Description:

Please read this patch description in its entirety before installing.

The post installation routine of this patch contains significant data conversions. A purge of some of the eIV data files, IIV RESPONSE (#365) and IIV TRANSMISSION QUEUE (#365.1), greatly reduces the conversion time. When the purge was run at test sites prior to the install, the installation of this patch took between 1-4 hours. When the files were not purged prior to the install, the installation did not complete in a reasonable amount of time.

Some sites have not purged eIV data in a long time, if ever. There is an option, Purge eIV Transactions [IBCNE PURGE IIV DATA] option, built into eIV to purge data. It allows old data to be purged, but retains at least the last 6 months. Data older than 6 months in these files is not current enough to be useful. There are instructions on how to run the purge later in this patch description. If the files have not been recently purged, this purge may result in significant journaling activity that could fill up journal disks. System managers should be made aware so that journal growth can be monitored and managed accordingly.

Unless your site routinely runs the purge, it is CRITICAL that the purge is executed prior to the install! The purge should NOT be run on the same night as the installation of this patch.

If for some reason the installer does not run the purge, the conversions will take significantly longer and potential for journaling and installation issues increase.

Finally, since the post installation takes quite a while depending on the site, it is IMPERATIVE that this patch is queued for installation. This is also explained in greater detail in the patch installation instructions later in this patch description.

This Integrated Billing (IB) patch introduces substantial changes to VistA's electronic Insurance Verification (eIV) Eligibility Inquiry and Response Processing in order to meet the Committee on Operating Rules for Information Exchange (CORE) Operating Rules.

Complete list of patch items:

- 1. Allow VistA to accept all X12N/5010 codes and qualifiers without validation since they have already been validated by the Eligibility Communicator (EC) at the Financial Services Center (FSC) in Austin prior to transmission to the VA Medical Centers (VAMC).
- 2. Allow Vista to accept, store and display additional policy/benefit information sent from payers which include Military Personal Information (X12N/5010 MPI), Provider Information (X12N/5010 PRV) and Health Care Diagnosis Code Information (X12N/5010 HI).
- 3. Provide the ability for users to view the AAA Error Reporting Codes and corresponding textual description in the Response Report View of Process Insurance Buffer [IBCN INSURANCE BUFFER PROCESS] when an Error Reporting Code is received in response to an X12N/5010 Health Care Eligibility Benefits Inquiry (270).
- 4. Transmit additional statistical information in the daily eIV registration message (HL7 MFN message) to the FSC.
- 5. Transmit the NAME OF INSURED (#17) Field of the INSURANCE TYPE SUB-FILE (#2.312) in the PID segment of the 270 HL7 message when the patient is the subscriber and there is a value in the NAME OF INSURED (#17) field.
- 6. Allow VistA to receive, store and display the AAA additional Error Message Text on the Response Report View of the Process Insurance Buffer [IBCN INSURANCE BUFFER PROCESS] when received in an X12N/5010 Health Care Eligibility Benefits Response.
- 7. A new option, Update Subscriber Info [IBCN UPDATE SUBSCRIBER INFO], required to be scheduled upon installation, which updates

subscriber fields in the INSURANCE TYPE SUB-FILE (#2.312), with the values stored in the PATIENT FILE (#2), when the PT. RELATIONSHIP - HIPAA (#4.03) field is self (18) and the field is blank and the insurance policy is Active. The option will then be added to the MCCR SYSTEM DEFINITION MENU [IB SYSTEM DEFINITION MENU] and require the IB SUPERVISOR key for future periodic use.

- 8. Remove Data from 11 Default Service Types codes stored in the IB SITE PARAMETERS FILE (#350.9) and replace with the default SERVICE TYPE CODE 30 Health Benefit Plan Coverage.
- 9. Remove any site selected service type codes from the IB SITE PARAMETERS FILE (#350.9).
- 10. Remove Medicare Insurance Intake option [IBCN MEDICARE INSURANCE INTAKE].
- 11. A new Worklist/report, Medicare Potential COB Worklist [IBCNE POTENTIAL COB LIST], of those patients whom Medicare has identified in a 271 HL7 response message as having insurance subsequent to their Medicare insurance.
- 12. Provide the ability for users to select an eligibility date for the Request Electronic Insurance Inquiry [IBCNE REQUEST INQUIRY] that is within the last 12 months or the end of the current month, defaulting to today's date if left blank.
- 13. Creation of Data Dictionary fields to allow the storage of  $\rm X12N/5010$  Health Care Eligibility Benefits Response (271) data elements to better align with HIPAA data lengths. Since many of the requested fields part of Integration Control Registration Agreements (DBIA) with other VistA Packages, the use of the larger storage capabilities will be unavailable until the subscribing packages have sufficient time to be remediated.
- 14. Reports and screen displays were modified to allow the display of increased field lengths above. Even though most of the increased field lengths will not be available until other packages using these fields are remediated, the reports and screen needed to be changed to allow for that eventuality.

#### Patch Components

\_\_\_\_\_\_

Please read this patch description in its entirety before installing.

The post installation routine of this patch contains significant data conversions. A purge of some of the eIV data files, IIV RESPONSE (#365) and IIV TRANSMISSION QUEUE (#365.1), greatly reduces the conversion time. When the purge was run at test sites prior to the install, the installation of this patch took between 1-4 hours. When the files were not purged prior to the install, the installation did not complete in a reasonable amount of time.

Some sites have not purged eIV data in a long time, if ever. There is an option, Purge eIV Transactions [IBCNE PURGE IIV DATA] option, built into eIV to purge data. It allows old data to be purged, but retains at least the last 6 months. Data older than 6 months in these files is not current enough to be useful. There are instructions on how to run the purge later in this patch description. If the files have not been recently purged, this purge may result in significant journaling activity that could fill up journal disks. System managers should be made aware so that journal growth can be monitored and managed accordingly.

Unless your site routinely runs the purge, it is CRITICAL that the purge is executed prior to the install! The purge should NOT be run on the same night as the installation of this patch.

If for some reason the installer does not run the purge, the conversions will take significantly longer and potential for journaling and installation issues increase.

Finally, since the post installation takes quite a while depending on the site, it is IMPERATIVE that this patch is queued for installation. This is also explained in greater detail in the patch installation instructions later in this patch description.

#### Pre/Post Installation Overview

-----

1. As part of the requirement to accept all X12 codes and qualifiers already validated prior to being sent to VistA in the 271 transaction from FSC's Eligibility Communicator, a number of data elements contained in entries in the IIV RESPONSE file (#365) and in the INSURANCE TYPE sub-file (#2.312) of the PATIENT file (#2) need to be converted from a SET OF CODES to POINTERS to specific code entries in the various X12 files. The post-install implements this data conversion. It first converts the entries the IIV RESPONSE (#365) file and then continues with the entries in the INSURANCE TYPE (#2.312) sub-file.

Although entries in the INSURANCE TYPE (#2.312) file CANNOT be purged, it is strongly recommended that any entries in the IIV RESPONSE file (#365) that are older than 6 months be purged. This purge can have a significant impact on how long it takes to run the install with respect to the data conversion depending when the last time this file was

purged. In some cases it has never been purged and contains almost ten years of response data. Please refer to the pre-installation instructions for performing the purge.

- 2. In order to satisfy the requirement of being able to store longer fields, a number of fields needed to be duplicated and the post-install will copy data from the shorter fields to the new, longer fields.
- 3. A one-time subscriber update utility must be scheduled upon installation of the patch. Unless the installation is queued, the post-install will prompt the installer of the patch to schedule this activity for off-hours. If the installation is queued, the new update utility will be scheduled for Tomorrow at 9 PM. This is in order to give the conversions time to complete. NOTE: This part of the process does NOT require that IB users be off the system, or un-scheduling of the eIV Nightly Process [IBCNE IIV BATCH PROCESS] option.
- 4. The eIV Nightly Process [IBCNE IIV BATCH PROCESS] option will need to be unscheduled before performing the installation of the patch. Once the installation and post-install conversion procedures are completed, the option will need to be rescheduled.

#### 2.3 Installation Instructions

Pre-Installation Instructions

The following 2 tasks should be performed before installing IB\*2\*497.

1. Purge eIV Transactions [IBCNE PURGE IIV DATA] option

To help reduce the time it takes to perform the installation due to the data conversion, it is strongly recommended that a day or two before installing the patch, the Purge eIV Transactions [IBCNE PURGE IIV DATA] option should be run in order to purge the eligible response records. This option schedules the purge to run at 8 pm TODAY. If it is already past 8 PM today, it should start up almost immediately.

Note: Please make sure the purge has completed prior to running the install. The purge process does NOT require that IB users be off the system, or un-scheduling of the eIV Nightly Process [IBCNE IIV BATCH PROCESS] option.

Example of running the eIV option below:

Select OPTION NAME: IBCNE PURGE IIV DATA Purge eIV Transactions Purge eIV Transactions

Purge Electronic Insurance Verification (eIV) Data Files

This option will allow you to purge data from the eIV Response File (#365) and the eIV Transmission Queue File (#365.1). The data must be at

least six months old before it can be purged. Only insurance transactions that have a transmission status of "Response Received", "Communication Failure", or "Cancelled" may be purged. You will be allowed to select a date range for this purging. The default beginning date will be the date of the oldest eligible record in the system. The default ending date will be six months ago from today's date. You may modify this default date range. However, you may not select an ending date that is more recent than six months ago.

Enter the purge begin date: 10/10/2003// (OCT 10, 2003)

Enter the purge end date: 03/05/2013// (MAR 05, 2013)

You want to purge all eIV data created between 10/10/2003 and 03/05/2013.

OK to continue? NO// YES

Task# 155226 has been scheduled to purge the eIV data tonight at 8:00 PM.

# 2. eIV Nightly Process [IBCNE IIV BATCH PROCESS] option

Since the installation of this patch could take a number of hours to complete due to the conversion procedures, it will be necessary to unschedule the eIV Nightly Process [IBCNE IIV BATCH PROCESS] option before installing the patch. An example of unscheduling this task below:

Select Taskman Management <TEST ACCOUNT> Option: SCHEDule/Unschedule Options

Select OPTION to schedule or reschedule: IBCNE IIV BATCH PROCESS eIV NIGHT LY PROCESS

 $\dots$ OK? Yes// (Yes) (R)

It is \*strongly\* recommended that this patch be installed outside of normal working hours. This patch contains multiple file/field conversions and running time depends on a number of factors. Running time could be anywhere from a couple hours to numerous hours to install. Instructions are provided for running install in background.

\*\*\*\* NO INTEGRATED BILLING USERS SHOULD BE ON THE SYSTEM DURING INSTALLATION OF THIS PATCH. \*\*\*\*

\*\*\*\* Do not install this patch when the eIV NIGHTLY PROCESS [IBCNE IIV BATCH PROCESS] background job is running or scheduled to run. Please refer to the Pre-installation instructions for the unscheduling of this option.\*\*\*

There are no additional menu options to disable.

- 1. Choose the PackMan message containing this patch.
- 2. Choose the INSTALL/CHECK MESSAGE PackMan option.
- 3. From the Kernel Installation and Distribution System Menu, select the Installation Menu. From this menu, you may elect to use the following option. When prompted for the INSTALL enter the patch #(B\*2.0\*497):
  - a. Backup a Transport Global This option will create a backup message of any routines exported with this patch. It will not backup any other changes such as DD's or templates.
  - b. Compare Transport Global to Current System This option will allow you to view all changes that will be made when this patch is installed. It compares all components of this patch (routines, DD's, templates, etc.).
  - c. Verify Checksums in Transport Global This option will allow you to ensure the integrity of the routines that are in the transport global.
- 4. From the Installation Menu, select the Install Package(s) option and choose the patch to install.
- 5. When prompted 'Want KIDS to Rebuild Menu Trees Upon Completion of Install? YES//'

Options are being added as well as removed, so Rebuilding Menu Trees is recommended.

- 6. When prompted 'Want KIDS to INHIBIT LOGONs during the install? NO//'
- 7. When prompted 'Want to DISABLE Scheduled Options, Menu Options, and Protocols? NO//

Again, no Integrated Billing Users should be on the system and install Should occur outside of normal working hours.

8. A one-time subscriber update utility must be scheduled upon installation of the patch. During installation, the post-install routine prompts for the installer to schedule the one time subscriber update utility and will not complete installation until it is scheduled. If the install is queued to run, it will automatically schedule this utility to run TOMORROW @ 9PM. \*\*\*Queuing install is strongly recommended\*\*\*

\*\*\*\*\*\* INSTRUCTION FOR QUEUEING INSTALL \*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*

8a. At the 'DEVICE:' prompt, enter 'Q' for Queue to run this in background. You will then be prompted for 'DEVICE:' again. This is for where you would like the output from the Queued install to be directed. You may enter NULL, HFS, or any other DEVICE that allows it to be accessed from a Queued job. If you choose not to queue the install, there is a good chance that this install will not complete without experiencing a network timeout and will need to be restarted. While it was written so that the post-install could pick up where it left off, the post-install conversion needs to complete as close to the install which includes the data dictionary changes as possible.

\*\*\*\*\*\* INSTRUCTION FOR RUNNING INSTALL IN FOREGROUND \*\*\*\*\*\*\*\*

8b. At the 'DEVICE' prompt, hit the return key which will enable the Install to run in the foreground. Installation results are displayed to the screen. The prompt to schedule the one-time subscriber update utility is issued to the installer. The following shows an example of the message and then the date/time prompt that is generated:

Enter date/time to queue the option: T+1@2100//

Update Subscriber Information Scheduled for SEP 06, 2013@21:00

Post-Installation Instructions

1. In order to verify the post-install routine was run successfully, please examine the patch entry in the INSTALL file and report any error

messages to Product Support.

- 2. After the installation has completed, and if allowed by your Kernel site parameter configuration, confirm the post-install routine, IBY497PO, was removed.
- 3. Once the patch has COMPLETED INSTALLATION, which can take several hours, reschedule the eIV NIGHTLY PROCESS [IBCNE IIV BATCH PROCESS] option that was unscheduled at pre-installation.

# Routine Information:

The second line of each of these routines now looks like: ;;2.0;INTEGRATED BILLING;\*\*[Patch List]\*\*;21-MAR-94;Build 120

The checksums below are new checksums, and can be checked with CHECK1^XTSUMBLD.

# 3 Enhancements

The following features in VistA, Integrated Billing are affected by this effort:

- 3.1 Process Insurance Buffer [IBCN INSURANCE BUFFER PROCESS]
  - AAA Errors Response Report

Provides the ability for users to view the Error Reporting Codes and corresponding textual description in the Response Report View of the Insurance Buffer when an error Reporting Code is received in response to an X12N/5010 Health Care Eligibility Benefits Inquiry (270).

#### • X12N/5010 271 Code Sets – Expanded Benefits

Provides the ability to receive the all Codes and Qualifiers in Expanded Benefits when received in an X12N/5010 Health Care Eligibility Benefits Response (271) without validation.

#### • X12N/5010 271 Code Sets – Expanded Benefits

Provides the ability to store the all Codes and Qualifiers in Expanded Benefits when received in an X12N/5010 Health Care Eligibility Benefits Response (271) without validation.

## • X12N/5010 271 Code Sets – Expanded Benefits

Provides the ability to display the all Codes and Qualifiers in Expanded Benefits when received in an X12N/5010 Health Care Eligibility Benefits Response (271) without validation.

# 3.2 HL7 Transactions Related to 270/271 Transactions/Daily Registration Messages

#### • Daily Statistics to FSC

Transmits additional statistical information in the daily eIV registration message (HL7 MFN message) to the FSC in Austin, Texas.

#### • 270 - Transmit Insured Name – Patient Subscriber

Transmits the NAME OF INSURED Field (2.312:17) in the PID segment of the 270 HL7 message when the patient is the subscriber and there is a value in the NAME OF INSURED field.

#### • 270 - Transmit Patient Name – Patient Subscriber

Transmits the NAME Field (2: .01) in the PID segment of the 270 HL7 message when the patient is the subscriber and there is no value in the Name of Insured field.

#### • 270 - Transmit Patient Name – Patient Not Subscriber

Continues to transmit the NAME Field (2: .01) in the PID segment and the NAME OF INSURED field in the GT1 segment (2.312:17) of the 270 HL7 message when the patient is not the subscriber.

#### • 270 - Extract – Default Service Type Codes

Automatically includes the 30-Health Benefit Plan Coverage default Service Type code replacing the current list of codes in the NTE segment of the 270 HL7 messages transmitted automatically through the buffer extract.

# • 270 – Receive EB\*V~MSG\*additional Error Message Text~ – AAA Error Message Text

Provides the ability to receive the AAA additional Error Message Text when received in an X12N/5010 Health Care Eligibility Benefits Response.

## 270 – Store EB\*V~MSG\*additional Error Message Text~ – AAA Error Message Text

Provides the ability to store the AAA additional Error Message Text when received in an X12N/5010 Health Care Eligibility Benefits Response.

## 270 – Display EB\*V~MSG\*additional Error Message Text~ – AAA Error Message Text

Provides the ability to display the AAA additional Error Message Text on the Response Report View of the Insurance Buffer when received in an X12N/5010 Health Care Eligibility Benefits Response.

• 270 – Transmit Registration Message after initial installation of the Patch Transmits a registration message upon initial installation of the software into production at each VAMC informing FSC of the upgrade to the new interface version.

#### 3.3 Patient Insurance Info View/Edit [IBCN PATIENT INSURANCE]

#### Update Subscriber Information

Includes a new option required to be scheduled to update the subscriber fields in the Insurance Type file, with the values stored in the Patient file, upon installation of the software at a site when the patient's relationship to the insured is self (18) and the field is blank and the insurance policy is Active.

#### 3.4 MCCR System Definition Menu [IB SYSTEM DEFINITION MENU]

## Add New Option for Subscriber Information

Includes a new option to provide the ability for users holding the IB SUPERVISOR KEY to update subscriber fields in the Insurance Type sub-file for all patients, with the values stored in the Patient file, when the patient's relationship to the insured is self (18) and the field is blank and the insurance policy is Active.

#### • Store Default Service Type Codes

Stores only Service Type Code 30 – Health Benefit Plan Coverage in the IB Site Parameters file accessible from [MCCR Site Parameter Display/Edit].

#### • Site-defined Service Type Codes

No longer allow users to define Service Type codes by site, to be included automatically in 270 HL7 messages.

## • Remove Existing Site-defined Service Type Codes

Updates the IB Site Parameters file (350.9) to remove all site-defined Service Type codes after the software is installed.

#### • Site-defined Service Type Codes Screen Display

No longer contains a section on the [MCCR Site Parameter Display/Edit] ListManager screen to display Service Type codes by site.

#### 3.5 Medicare Insurance Intake [IBCN MEDICARE INSURANCE INTAKE]

## Remove Medicare Insurance Intake Option

No longer provides the ability for users to enter Patient Insurance information through the Medicare Insurance Intake option, [IBCN MEDICARE INSURANCE INTAKE].

## 3.6 Integrated Billing Reports

- Third Party Joint Inquiry [IBJ THIRD PARTY JOINT INQUIRY]
- Claims Tracking Edit [IBT EDIT BI TRACKING ENTRY]
- Patient Insurance Info View/Edit [IBCN PATIENT INSURANCE]
- Process Insurance Buffer [IBCN INSURANCE BUFFER PROCESS]
- eIV Response Report [IBCNE IIV RESPONSE REPORT]
- eIV Ambiguous Policy Report [IBCNE IIV AMBIGUOUS POLICY RPT]
- eIV Inactive Policy Report [IBCNE IIV INACTIVE POLICY RPT]

#### 3.7 Request Electronic Insurance Inquiry [IBCNE REQUEST INQUIRY]

- Eligibility Date Criteria
- Eligibility Date Default
- Eligibility Date Transmission
- 270 Individual Request Default Service Type Codes
- 270 Individual Request Default Service Type Codes
